FOR IMMEDIATE RELEASE

BEAVER STREET FISHERIES SELECTS ENTERPRISE INTEGRATION FOR IT SERVICES

JACKSONVILLE, Fla., *February 19, 2015* – Beaver Street Fisheries (BSF), home to one of the top frozen seafood brands in the United States, has selected Enterprise Integration (EI), leading Jacksonville-based IT solutions provider, for managed database administration services.

BSF is a leading importer, manufacturer and distributor of frozen seafood products and has provided quality products to the seafood industry for more than 60 years.

Steve Giovanni, Associate Vice President of EI's Strategic Mid-Tier division, said of the partnership, "Beaver Street Fisheries is extremely well known in the North Florida region, not just for their association with the Jaguars organization, but also for their longstanding reputation for quality in the community. We are very excited to help them proactively manage their databases, on which their business depends."

Scott Lane, Chief Information Officer for BSF said, "As we went through the bid process, the depth of expertise of the staff at Enterprise Integration was unparalleled. They are the experts we needed managing our critical databases."

Lane also added that BSF was looking to partner with a local Jacksonville company, so EI was a perfect fit. Both Beaver Street Fisheries and Enterprise Integration are based in Jacksonville, Florida, and make it a practice of working with other local companies when possible.

With the addition of Beaver Street Fisheries, EI has experienced a 15% increase in client acquisition during 2015. After 2014 was deemed the worst year in data breach history, the information technology industry has seen a growth in customer demands for security solutions and IT infrastructure management.

###

Enterprise Integration (EI) is a client-service driven managed service provider headquartered in Jacksonville, FL, delivering the promise of IT worldwide. EI offers proactive IT monitoring and management, managed outsourcing, security solutions and ITIL consulting.
